How to use your VEEV GRAND™

Customization Button

Use to check and change the Power Mode.

Status Button

Use to activate, lock, unlock, reset the device and check battery level.

ACTIVATE

To activate, it is recommended to fully charge your device as per Safety Warnings & Instructions. Alternatively, long press the Status Button until the Status Lights ramp-up. Your device is activated.

INSERT POD

Insert the VEEV GRAND™ pod. The Status Lights turn On slowly and display the battery level.

LOCK/UNLOCK

To **lock** your device, press the Status Button for 5 seconds until the Status Lights ramp-down and the highest and lowest Status Lights blink.

To **unlock**, press the Status Button for 5 seconds until the Status Lights ramp-up.

When you try to use your device and the highest and lowest Status Lights blink, your device is locked.

POWER MODES

You can select the Power Mode.

Full Mode:

Delivers amplified, intense flavour experience and dense vapour.

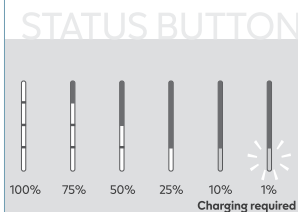

Smooth Mode:

Provides soft flavour experience with lighter vapour, designed to support longer-lasting experience and more puffs per pod and per charge.

To check the Power Mode short press the **Customization Button** once.

To change the Power Mode short press the **Customization Button** twice.

BATTERY LEVELS

Short press the Status Button, the Status Lights will turn On to indicate the battery level.

When battery level has reached 10%, **YELLOW** light will turn On and charging is required. When battery level has reached 1%, **YELLOW** light will blink 5 times and device will not operate until it has been recharged.

LOW LIQUID DETECTION

The lowest Status Light blinks **RED** then **WHITE**, 3 times. Ensure your device is used upright. If the warning persists, replace the pod to continue using.

ERROR NOTIFICATION

If your device is not working and the highest Status Light blinks **WHITE** then the lowest Status Light blinks **RED**, 2 times, clean the contacts where the pod is inserted or change the pod.

If your device is not working and the lowest Status Light blinks **RED** more than once, **RESET** your device.

If the errors persist, visit veev-vape.com/support.

TEMPERATURE WARNING

All Status Lights blink **WHITE** 4 times. Device is outside operating temperature range. Once the blinking stops you can continue using your device.

RESET

Press the Status Button for 10 seconds until all Status Lights blink **WHITE** 2 times to confirm the RESET. After RESET device is ready for use.
